

WHAT WE OFFER

Established in 1997 in the US and now with a global presence, JeanMartin provides Software Development, Consultancy Services and ITES to a range of clients across global enterprises in various verticals.

JeanMartin Services ensure that your hotel IT infrastructure and applications are designed, managed and operated 24x7x365, ensuring that you have a high availability and secure environment to transact your business.

We provide services ranging from Infrastructure consulting, End User Support, Above-Property Application and Datacenter Management to Technical Service Desk - all delivered with the industry standard practices like ITIL and BS 15000. JeanMartin's Global Delivery Model ensures that all work is on time and on budget. **TEXT OR LOGO HERE.**

A CLIENT AND HIS CHALLENGE

Empee Group was constructing a chain of Hilton hotels across India and in Chennai.

The client was looking for a consultant and partner who has experience in decoding the IT requirements and matching the standards of Hilton while keeping the project within budget.

The scope was Design, Supply, Installation, and Testing & Commissioning of Networking (Voice and Data) systems along with accessories, Design and deployment of Applications in a server farm configured in-house data center.

Duration of the Project was the key challenge as there were as more than 20 vendors working in Tandem towards the completion.
